

Dear Mr. President,

My name is Francis Bok. I am former slave in a country of Sudan. I am writing to you in regards to the issue of genocide. In my opinion, genocide should be stopped because it is killing many innocent people.

The reason genocide should be stopped is people will miss their families and friends. Families will miss their children because the children are being kidnapped. Many families are emotionally hurt because their children are being taken away from them. For example, I experienced some thing horrible. I was kidnapped in the market place. While being kidnapped, I heard many moms crying.

A second reason genocide should be stopped is many people are being killed for no reason. My people in southern Sudan are being killed cause of their religious belief. Also there are many girls that are being raped and killed. They could not escape from the torture they are in.

Genocide is cruel and illegal because it is a crime against humans. The government tried to stop the problem but it did not succeed. It is inhuman to kill people. The arab are killing people for fun they shoot there AK-47 at people. After they finish killing people they leave to there camp
